Sub: Regarding to apologize to delay delivery of the final report\par

\par

Hi Rajesh,\par

\par

Good morning , i hope are doing well. I apologize to delay delivery of the final report to client because had more errors in that report .Server issue has present in this project, backend code no yet runned and API is not fetching the data in the server . So, i can't delivery the final report to client. I taken steps to rectify is specified in below bullet points.\par

\par

Find out the server issue by checking data collection is properly work or not . If it not working alternate Database is needed (MY SQL server).\par

API is not yet working I need alternate API is named as (REST API).\par

I recheck the backend code by testing (unit Testing).\par

Thank you\par

\par

Thanks & Regards\par
